**Principles of Neuropsychology** By Eric A. Zillmer, Mary V. Spiers, William C. Culbertson

Focusing on applied and clinical examples, the Second Edition of **PRINCIPLES OF NEUROPSYCHOLOGY** is an exciting and dynamic approach to neuropsychology that should inspire both students and teachers. This progressive and accessible text teaches brain function in a clear and interesting manner by providing the most recent studies and research available in this ever-developing field. Applying the underlying thesis that all interactions in daily life, whether adaptive or maladaptive, can be explained neuropsychologically, the authors emphasize five specific ideas: human neuropsychology-both experimental and clinical, integration of theory and research, coverage of the relationship between neuroscience and behavioral function, real-life examples, and the presentation of didactic aids. Integrating these themes with the most up-to-date research provides all readers-whether or not they have had previous exposure to the field-with the most current and accessible text available.

## **Editorial Review**

### **About the Author**

Dr. Eric A. Zillmer received his Psy.D. from Florida Institute of Technology. He completed his internship training at Eastern Virginia Medical School, and also completed a two-year postdoctoral fellowship in neuropsychology at the University of Virginia Health Sciences Center. Currently, Dr. Zillmer is the Pacifico Professor of Neuropsychology at Drexel University where he teaches courses in neuropsychology, abnormal psychology, psychological assessment and sports psychology.

Dr. Mary V. Spiers received her Ph.D. in clinical psychology at the University of Alabama at Birmingham, where she specialized in medical psychology and neuropsychology. Currently Dr. Spiers is an associate professor of psychology at Drexel University and is also the former director of the Graduate Program in Clinical Psychology. She teaches courses in neuropsychology, neuropsychological assessment, tests and measurement, ethics and professional issues in psychology, models of memory in neuropsychology, and health psychology for women.

Dr. William Culbertson received his Psy.D. from Rutgers University. He teaches and conducts research in the area of pediatric neuropsychology, attention deficit disorder, executive functioning, and neuropsychological assessment. He is the co-author of the popular neuropsychological test of executive functioning, the Tower of London 4 DX. Dr. Culbertson is in full-time private practice specializing in the assessment and treatment of children and adolescents, particularly those with attention-deficit hyperactivity disorder.

## **Users Review**

### **From reader reviews:**

#### **Louis Venable:**

With other case, little individuals like to read book Principles of Neuropsychology. You can choose the best book if you like reading a book. As long as we know about how is important any book Principles of Neuropsychology. You can add know-how and of course you can around the world with a book. Absolutely right, mainly because from book you can recognize everything! From your country until foreign or abroad you will be known. About simple point until wonderful thing you can know that. In this era, we can easily open a book or perhaps searching by internet gadget. It is called e-book. You need to use it when you feel fed up to go to the library. Let's learn.

#### **Jason Manuel:**

Playing with family within a park, coming to see the coastal world or hanging out with friends is thing that usually you could have done when you have spare time, subsequently why you don't try point that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Principles of Neuropsychology, it is possible to enjoy both. It is great combination right, you still wish to miss it? What kind of hang-out type is it? Oh come on its mind hangout folks. What? Still don't understand it, oh come on its named reading

friends.

**Eleanor Hotchkiss:**

Do you like reading a book? Confuse to looking for your best book? Or your book ended up being rare? Why so many question for the book? But almost any people feel that they enjoy to get reading. Some people likes studying, not only science book but in addition novel and Principles of Neuropsychology as well as others sources were given information for you. After you know how the fantastic a book, you feel need to read more and more. Science publication was created for teacher as well as students especially. Those books are helping them to add their knowledge. In other case, beside science book, any other book likes Principles of Neuropsychology to make your spare time considerably more colorful. Many types of book like this one.

**Charles Hopper:**

As a scholar exactly feel bored for you to reading. If their teacher expected them to go to the library or to make summary for some book, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that reading through is not important, boring and also can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Principles of Neuropsychology can make you truly feel more interested to read.
