### Sets, Logic and Categories (Springer Undergraduate Mathematics Series)

By Peter J. Cameron

Set theory, logic and category theory lie at the foundations of mathematics, and have a dramatic effect on the mathematics that we do, through the Axiom of Choice, Gödel's Theorem, and the Skolem Paradox. But they are also rich mathematical theories in their own right, contributing techniques and results to working mathematicians such as the Compactness Theorem and module categories. The book is aimed at those who know some mathematics and want to know more about its building blocks. Set theory is first treated naively and an axiomatic treatment is given after the basics of first-order logic have been introduced. The discussion is supported by a wide range of exercises. The final chapter touches on philosophical issues. The book is supported by a World Wide Web site containing a variety of supplementary material.

## **Editorial Review**

Review

From the reviews:

BULLETIN OF MATHEMATICS BOOKS

"...a well written introduction to logic, with a good dose of set theory (introduction to ordinals and cardinals) and a small dose of categories at the end. (I read this one cover to cover.)"

## **Users Review**

**From reader reviews:**

**Ray Ellis:**

Here thing why this specific Sets, Logic and Categories (Springer Undergraduate Mathematics Series) are different and trustworthy to be yours. First of all reading a book is good however it depends in the content of it which is the content is as scrumptious as food or not. Sets, Logic and Categories (Springer Undergraduate Mathematics Series) giving you information deeper including different ways, you can find any publication out there but there is no book that similar with Sets, Logic and Categories (Springer Undergraduate Mathematics Series). It gives you thrill examining journey, its open up your eyes about the thing in which happened in the world which is probably can be happened around you. You can actually bring everywhere like in playground, café, or even in your means home by train. When you are having difficulties in bringing the imprinted book maybe the form of Sets, Logic and Categories (Springer Undergraduate Mathematics Series) in e-book can be your alternative.

**Joshua Nichols:**

Reading a publication can be one of a lot of task that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a publication will give you a lot of new data. When you read a book you will get new information mainly because book is one of various ways to share the information or even their idea. Second, studying a book will make an individual more imaginative. When you looking at a book especially tale fantasy book the author will bring that you imagine the story how the figures do it anything. Third, you could share your knowledge to others. When you read this Sets, Logic and Categories (Springer Undergraduate Mathematics Series), it is possible to tells your family, friends as well as soon about yours guide. Your knowledge can inspire the mediocre, make them reading a guide.

**Harold Morris:**

Reading can called mind hangout, why? Because if you find yourself reading a book especially book entitled Sets, Logic and Categories (Springer Undergraduate Mathematics Series) your mind will drift away trough

every dimension, wandering in every single aspect that maybe unfamiliar for but surely can become your mind friends. Imaging every single word written in a guide then become one type conclusion and explanation which maybe you never get before. The Sets, Logic and Categories (Springer Undergraduate Mathematics Series) giving you an additional experience more than blown away your brain but also giving you useful data for your better life within this era. So now let us demonstrate the relaxing pattern at this point is your body and mind will be pleased when you are finished examining it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?

**Donna Robinson:**

Are you kind of hectic person, only have 10 or perhaps 15 minute in your time to upgrading your mind talent or thinking skill even analytical thinking? Then you have problem with the book in comparison with can satisfy your limited time to read it because pretty much everything time you only find reserve that need more time to be learn. Sets, Logic and Categories (Springer Undergraduate Mathematics Series) can be your answer since it can be read by anyone who have those short extra time problems.
