Principles of Neuropsychology By Eric A. Zillmer, Mary V. Spiers

Written from a functional perspective, this text offers an applied, clinical, real-life focus and detailed information on neuropathology, clinical syndromes, brain theory, neuropsychological assessment, mind-brain issues, and methods of investigating the brain. Thorough without being encyclopedic, the text presents an appropriate balance of clinical neuropsychology (primary focus) and experimental neuropsychology (secondary focus). By covering the role of the brain in behaviors that range from those as simple as a reflex to those as complex as personality and religion, the authors challenge students to consider behavior from a broader biological perspective. The authors' creative, balanced approach combined with strong pedagogy, current scholarship, and extensive illustrations, positions the text above all competing resources.

Editorial Review

About the Author

Dr. Eric A. Zillmer received his Psy.D. from Florida Institute of Technology. He completed his internship training at Eastern Virginia Medical School, and also completed a two-year postdoctoral fellowship in neuropsychology at the University of Virginia Health Sciences Center. Currently, Dr. Zillmer is the Pacifico Professor of Neuropsychology at Drexel University where he teaches courses in neuropsychology, abnormal psychology, psychological assessment and sports psychology.

Dr. Mary V. Spiers received her Ph.D. in clinical psychology at the University of Alabama at Birmingham, where she specialized in medical psychology and neuropsychology. Currently Dr. Spiers is an associate professor of psychology at Drexel University and is also the former director of the Graduate Program in Clinical Psychology. She teaches courses in neuropsychology, neuropsychological assessment, tests and measurement, ethics and professional issues in psychology, models of memory in neuropsychology, and health psychology for women.

Users Review

From reader reviews:

Tracie Berry:

Here thing why this particular Principles of Neuropsychology are different and reputable to be yours. First of all looking at a book is good but it really depends in the content than it which is the content is as tasty as food or not. Principles of Neuropsychology giving you information deeper as different ways, you can find any e-book out there but there is no book that similar with Principles of Neuropsychology. It gives you thrill examining journey, its open up your eyes about the thing this happened in the world which is possibly can be happened around you. You can bring everywhere like in area, café, or even in your method home by train. When you are having difficulties in bringing the imprinted book maybe the form of Principles of Neuropsychology in e-book can be your option.

Wendy Poston:

Reading a e-book can be one of a lot of exercise that everyone in the world adores. Do you like reading book and so. There are a lot of reasons why people like it. First reading a guide will give you a lot of new info. When you read a book you will get new information due to the fact book is one of various ways to share the information or maybe their idea. Second, reading a book will make a person more imaginative. When you examining a book especially hype book the author will bring someone to imagine the story how the characters do it anything. Third, you could share your knowledge to other folks. When you read this Principles of Neuropsychology, you may tells your family, friends along with soon about yours book. Your knowledge can inspire different ones, make them reading a publication.

Cara Fultz:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their down time with their family, or their very own friends. Usually they performing activity like watching television, likely to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your personal free time/ holiday? Could possibly be reading a book may be option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to test look for book, may be the e-book untitled Principles of Neuropsychology can be excellent book to read. May be it might be best activity to you.

Michael Lockwood:

A lot of guide has printed but it is different. You can get it by internet on social media. You can choose the most effective book for you, science, comedy, novel, or whatever through searching from it. It is called of book Principles of Neuropsychology. You can add your knowledge by it. Without leaving the printed book, it can add your knowledge and make a person happier to read. It is most essential that, you must aware about e-book. It can bring you from one destination for a other place.
