Editorial Review

Review

"'Rapid Medicine' is laid out very clearly...And the content for each condition is very good." (*Oxford Medical School Gazette*, vol. 54 (1))

"This layout enables you to flick through and find the condition you want quickly and easily." (*North Wing, Sheffield Medics Magazine*, Winter 2004)

Review

"This book hasn't got any pretty pictures, but it is great for some of those last minute cramming sessions where you just need the basics all on one page."

—**5th Year Medical Student**, Liverpool Medical School, Sphincter, December 2003

"The contributors to this little pocket reference book are to be saluted for taking on what seems like an impossible task and doing a very good job.... I liked how the authors boiled down the essential facts to the bare bones on physical exam, work-up, and clinical presentation. Each segment is represented by only a few sentences. Not an easy task with so much information to not include.... This is a very handy pocket reference. I think it is a good study guide in presenting the important basics one must know in internal medicine."

—**Patricia Wong, MD** (Stanford University Medical Center)

"Rapid medicine has it all and the format of the book facilitates "smart study" not hard study. Facts are covered in a simple and memorable fashion. In this respect it is also ideal for exam study."

—**New Doctor**, Auckland University Medical Students

"This book is a comprehensive and concise review of the spectrum of medical conditions that clinicians will come across. Invaluable for consultation on the wards, in A&E. And a fantastic revision tool. Can't be recommended highly enough."

—**Medical Student**

"It is actually a remarkably useful book...The book is best used either as an aide memoir for conditions about which you have already learned, or as a rapid learning process about a condition you feel your consultant is going to grill you on very shortly."

—**Medical Student**, Guy's, King's, St. Thomas' Medical School, GKT, February 2004
