Mapping the World by Heart By David J. Smith

If you placed blank sheets of paper in front of your students, could they draw a detailed map of the entire world? It may seem hard to believe, but after exploring the innovative Mapping the World by Heart curriculum, students have a comprehensive knowledge of geography that allows them to map the world entirely from memory!

- Teaches students to draw entirely from memory detailed world maps including the names, borders, mountain ranges, rivers, and major cities of more than 190 countries. - Gets students excited about geography and encourages them to think globally. - Promotes positive student interactions and collaboration, both in small group work and as a class. - Provides teachers with flexible lessons they can easily integrate into their existing curriculum. - Gives students a constructive goal to work towards all year long. Product Format: Designed for grades 5-12, Mapping the World by Heart includes a set of maps and a comprehensive teacher's guide that makes it easy to integrate lessons and activities into any class's existing curriculum. Combining memorization with the real use of knowledge, practice, mnemonics, large and small group activities, and games, Mapping the World by Heart inspires students to study and love geography. The award-winning curriculum is the creation of David J. Smith, a teacher with over 25 years' experience in the middle school classroom. TIME Magazine, NBC's Today Show, the Boston Globe, the Los Angeles Times, the New York Times, and the Associated Press have written about David Smith and the great success his curriculum has brought to classrooms across the country. FableVision founder Peter H. Reynolds fell in love with David's breakthrough approach almost 20 years ago. He was with Tom Snyder Productions when they first published Mapping the World by Heart in 1992. At that time, Peter provided the charming illustrations for the teacher's guide, which remain with the product to this day. Recently, Peter and David connected and decided that FableVision Learning was the perfect new home for this innovative and creative geography curriculum. It is with great pleasure that FableVision Learning has added Mapping the World by Heart to its growing collection of tools for your creative classroom. When it was first released, Mapping the World by Heart was awarded the Breaking the Mold Award by the U.S. Department of Education. It has been through nine complete revisions, and is updated regularly. Includes: Comprehensive Teacher's Guide - Contains detailed lesson plans and reproducibles for students. - Three new supplements for teachers who wish to focus on a special area Mapping Canada by Heart, Mapping the U.S. by Heart, and Mapping Mexico by Heart.

Reproducible desk-outline maps, 11 x 17 inches - 10 regional maps (Canada, U.S., Mexico, Central America, South America, Africa, Europe, Eastern Europe and North Asia, South Asia, Oceania). - World maps blank grids and filled-in outline maps of the world in each of three projections Mercator, Robinson, and Equirectangular.

Editorial Review

Review

This program is exactly what the teacher ordered. The units are user friendly and can be easily adapted for the home school user. When teaching kids who are more advanced you can double up on the units, or space them out for those requiring a slower pace. You can tailor each section as needed. When done with this entire curriculum the children will have a more firm understanding of where in our world they are. --Dennis R. Hall's review on Amazon

I used this curriculum with a homeschool co-op. I taught twelve children ranging from grades 4-12. Our before world maps from memory hardly contained any information and very unusual continent shapes and locations, even the one done by grades 9-12. As we mapped and labeled each continent, we also did a study of the history and culture of the countries in each continent. Every week, each student researched a different area of each culture and gave oral presentations in class.(these ideas/activities are given in the curriculum.) Our end of year maps from memory are the best endorsement I could give. I wish you could see them. The continents were accurately drawn and 70 to 80 percent of the details like landforms, political divisions and capital cities were included. Our best map was completed by a 6th grader who was able to list every single item on the mapping the world by heart list given in the curriculum. There is some teacher preparation in doing extra activities recommended in the curriculum. My only complaint was that the map sheets were not available in smaller quantities so we had to come up with our own outline maps to label. I highly recommend that every student be required to complete this curriculum before reaching highschool. My history class no longer has to ask -Where is that? --Joan Brancaleone's review on Amazon

I am a 7th grade teacher from Madison Wisconsin. I have used this program for 12 years. I teach about 150 kids each school year and all of them, from the very brightest to the very lowest ability children, learn it in their own right. We practice one continent at a time and learn mnemonic devices to reinforce newly acquired knowledge. For example, the phrase -Cute James Hates Doing Puzzles represents the Caribbean Islands of Cuba, Jamaica, Haiti, Dominican Republic, and Puerto Rico in order from west to east. The word BASMOQN represents the lower Canadian provinces in order from west to east: British Columbia, Alberta, Saskatchewan, Manitoba, Ontario, Quebec, Newfoundland. I show the students how to draw each region and we practice, practice, practice. When I feel they're ready, I test them on each region by asking them to draw it by heart on their posters with nothing more available to them than a list of the correct spellings of the names of countries, provinces, and water bodies. The finished product-a big map of the world drawn by each student from memory, is truly breathtaking and every year parents and students who've had older siblings come through my class tell me that they still have their map. I highly recommend this program. --Colleen Reilly's review on Amazon

About the Author

David J. Smith has 26 years of experience teaching geography, history, and English in public and private schools. The U.S. Department of Education honored him in 1992 with their Breaking the Mold Award for this curriculum, and that, along with feature stories on The Today Show, and in Time Magazine, the Boston Globe, the New York Times, The International Educator, and other media, propelled him out of the classroom and into a full-time consulting practice. Since 1992, he has given workshops, seminars, and addresses in 30 countries and 38 states, both on Mapping The World By Heart curriculum and on geography and geographic literacy generally, focusing on what he refers to as world-mindedness across the curriculum.

Users Review

From reader reviews:

Paul Eastman:

Here thing why this kind of Mapping the World by Heart are different and trusted to be yours. First of all looking at a book is good however it depends in the content from it which is the content is as yummy as food or not. Mapping the World by Heart giving you information deeper and in different ways, you can find any publication out there but there is no publication that similar with Mapping the World by Heart. It gives you thrill reading journey, its open up your own personal eyes about the thing which happened in the world which is probably can be happened around you. It is easy to bring everywhere like in park, café, or even in your means home by train. Should you be having difficulties in bringing the published book maybe the form of Mapping the World by Heart in e-book can be your choice.

Stacey Smith:

Now a day people that Living in the era just where everything reachable by match the internet and the resources within it can be true or not call for people to be aware of each information they get. How individuals to be smart in acquiring any information nowadays? Of course the correct answer is reading a book. Reading a book can help individuals out of this uncertainty Information mainly this Mapping the World by Heart book because book offers you rich information and knowledge. Of course the data in this

book hundred percent guarantees there is no doubt in it you know.

Ann Goddard:

A lot of people always spent their free time to vacation or go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. If you wish to try to find a new activity this is look different you can read a book. It is really fun for yourself. If you enjoy the book that you just read you can spent all day every day to reading a publication. The book Mapping the World by Heart it doesn't matter what good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. Should you did not have enough space to develop this book you can buy typically the e-book. You can m0ore very easily to read this book from the smart phone. The price is not to cover but this book has high quality.

Jamila Coles:

This Mapping the World by Heart is great book for you because the content and that is full of information for you who have always deal with world and get to make decision every minute. This particular book reveal it data accurately using great coordinate word or we can point out no rambling sentences inside it. So if you are read it hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but tricky core information with lovely delivering sentences. Having Mapping the World by Heart in your hand like finding the world in your arm, facts in it is not ridiculous a single. We can say that no publication that offer you world throughout ten or fifteen second right but this reserve already do that. So , this is certainly good reading book. Hi Mr. and Mrs. active do you still doubt this?
