Chemistry By Julia Burdge

Chemistry, First Edition, by Julia Burdge has been created to bridge the gap in the McGraw-Hill general chemistry offerings. This textbook offers a clear writing style written with the students in mind. Julia uses her background of teaching hundreds of general chemistry students per year and creates content to offer more detailed explanation on areas where she knows they have problems.

Sitting down with the art house, Julia Burdge worked with the artist to create the style and major art pieces in her text. Out of these discussions, came the creation of the Visualizing Art two-page spreads which detail a process for the students and provide them with the answer to “What is the Point?”.

With outstanding art, a consistent problem-solving approach, interesting applications woven throughout the chapters, and a wide range of end-of-chapter problems, this is a solid first edition text.

Editorial Review

About the Author

Dr. Julia Burdge did most of her undergraduate work at Iowa State University, completing her bachelor's degree and Master's degree in inorganic chemistry at the University of South Florida in Tampa. She earned her Ph.D. in analytical chemistry at the University of Idaho. Her Master's and doctoral research involved the development of chemotherapeutic analogs of cisplatin and the development of instruments and methods for measuring ultra-trace concentrations of atmospheric sulfur compounds. Over the past 20 years, she has taught introductory and advanced courses in every division of the undergraduate chemistry curriculum, as well as interdisciplinary courses. She also developed and taught a new introductory chemistry course for pre-service science teachers, and initiated and served as a mentor in a future faculty development program for graduate students and post-doctoral associates. She is currently affiliated with the University of Idaho.

Users Review

From reader reviews:

Bobby Kile:

Book is to be different for every single grade. Book for children until finally adult are different content. To be sure that book is very important for us. The book Chemistry had been making you to know about other know-how and of course you can take more information. It is very advantages for you. The reserve Chemistry is not only giving you a lot more new information but also to become your friend when you feel bored. You can spend your own spend time to read your guide. Try to make relationship with the book Chemistry. You never truly feel lose out for everything when you read some books.

Carlee Smith:

Reading a reserve tends to be new life style in this particular era globalization. With studying you can get a lot of information which will give you benefit in your life. Using book everyone in this world can certainly share their idea. Publications can also inspire a lot of people. A lot of author can inspire their reader with their story or their experience. Not only the storyline that share in the textbooks. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their proficiency in writing, they also doing some analysis before they write with their book. One of them is this Chemistry.

James Roberts:

Why? Because this Chemistry is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will distress you with the secret that inside. Reading this book close to it was fantastic author who have write the book in such remarkable way makes the content inside of easier to understand, entertaining way but still convey the meaning completely. So , it is good for you because of not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of advantages than the other book

have got such as help improving your talent and your critical thinking method. So , still want to hesitate having that book? If I have been you I will go to the publication store hurriedly.

Dolores Young:

Reading can called mind hangout, why? Because when you find yourself reading a book particularly book entitled Chemistry the mind will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely can be your mind friends. Imaging each and every word written in a guide then become one web form conclusion and explanation in which maybe you never get just before. The Chemistry giving you a different experience more than blown away your thoughts but also giving you useful data for your better life with this era. So now let us demonstrate the relaxing pattern at this point is your body and mind will probably be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary spending spare time activity?
