Thirsty Planet: Strategies for Sustainable Water Management By Constance Elizabeth Hunt

By the year 2025 nearly 2 billion people will live in regions or countries with absolute water scarcity, even allowing for high levels of irrigation efficiency. In the face of this emerging global water crisis, how should the planet's water be used and managed in the 21st century? Current international water policy sees nature competing with human uses of water. Hunt takes issue with this perspective. She suggests that nature is the source of water and only by making the conservation of nature an absolute priority will we have water in the future to apply to human uses. This book looks at the complexity of the problem; it provides a wide array of ideas, information, case studies and ecological knowledge--often from remote corners of the developing world--that could provide an alternative vision for water use and management at this critical time.

Editorial Review

Review

'Constance Hunt does a valuable service by providing a concise and readable primer on the task of preserving the freshwater ecosystems on which we all depend. Thirsty Planet is required reading for anyone interested in learning what tools we have available to meet one of the greatest challenges to humanity and nature in the 21st century.' Kathryn S. Fuller, World Wildlife Fund 'This is a tremendous book for anyone taking a serious look at global water problems. Constance Hunt exposes the powerful forces that have damaged rivers and watersheds and impaired the ability of natural ecosystems to supply clean water. She shows that the big water companies are using their power for a dramatic takeover of public water resources for private profit without thought of sustainability for the long term.' Brent Blackwelder, Friends of the Earth

About the Author

Constance Hunt is a biologist and environmentalist with considerable experience in international policy and global campaigns for water management and conservation.

Users Review

From reader reviews:

Mandy Conway:

In this 21st hundred years, people become competitive in each and every way. By being competitive today, people have to do something to make these individuals survive, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yeah, by reading a reserve your ability to survive boost then having chance to stand up than other is high.
