Burton's Microbiology for the Health Sciences (Microbiology for the Health Sciences (Burton)) By Paul G. Engelkirk Ph.D. MT(ASCP), Janet Duben-Engelkirk EdD MT(ASCP)

Written in a straightforward and engaging style, this premier textbook provides students with the foundation in microbiology that they need to perform their day-to-day duties in a safe and knowledgeable manner. Coverage includes the core themes and concepts outlined for an introductory course by the American Society for Microbiology.

Developed for current and future healthcare professionals, the text offers vital coverage of antibiotics and other antimicrobial agents, epidemiology and public health, hospital-acquired infections, infection control, and the ways in which microorganisms cause disease. This comprehensive new Ninth Edition explores the major viral, bacterial, fungal, and parasitic human diseases, including patient care, and how the body protects itself from pathogens and infectious diseases.

A bound-in CD-ROM and a companion Website include case studies, additional self-assessment exercises, plus animations and special features that provide additional insight and fun facts on selected topics.

Editorial Review

Review

-- "I especially liked the tables - they're good summaries of important facts about the diseases, the causative agents and sometimes the treatment modalities. The anatomy drawings are very good -- and again serve as a good reference for other courses. I like the artwork depicting infectious disease and immunizations and illness in general that are the book. Sometimes these are the things a student will remember!" -- "Thus length does matter. Too much information leads to overwhelming students as much as too little information stupefies them. I believe that your author has hit a happy medium." -- "Although I would recommend that the text be covered in its numbered sequence, the book is written so that each individual instructor (or student for that matter) can adjust the order of the material."

Users Review

From reader reviews:

Tracie Wright:

What do you about book? It is not important with you? Or just adding material when you really need something to explain what your own problem? How about your extra time? Or are you busy particular person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have time? What did you do?
