Psychosurgery: New Techniques for Brain Disorders By Marc Lévêque

Psychosurgery, or the surgical treatment of mental disorders, has enjoyed a spectacular revival over the past ten years as new brain stimulation techniques have become available. Neuromodulation offers new possibilities for the treatment of psychiatric disorders such as depression, obsessive-compulsive disorder (OCD), addiction, eating disorders and autism. This work presents the history of this unique specialty and investigates current techniques and ethical challenges. With a wealth of illustrations and detailed anatomical diagrams, it provides essential information for medical practitioners, as well as anyone else interested in the fascinating advances being made in neuroscience today.

« I like the book as it provides a very nice overview of psycho- surgery in general. It is easy to understand for any (para)medical practitioner, but even specialists in the field may learn new things. They may also enjoy looking the well-known and less-known figures which illustrate the book. »

Professor Bart Nuttin

« Reading this book is like reading an anthology, or rather an encyclopaedia of the field of psychiatric surgery, spanning more than a century. This is a work with an unprecedented degree of erudition and knowledge, and the subject is presented in a didactic, scholar, and scientific manner, and is extensively referenced and illustrated. If only one book is to be read by anybody interested in this field, regardless of specialty, this is The Book to read. »

Professor Marwan Hariz

Editorial Review

Review

From the reviews:

“The author has produced a very readable and honest account of this important subject. ... Psychiatrists, neurosurgeons, psychologists, medical/psychiatric historians, and other mental health practitioners would this book of interest. ... This is a superb book on the history and current state of this controversial procedure and a welcome addition to the psychiatric literature. I highly recommend it to anyone interested in psychiatry and psychiatric treatments.” (Michael Joel Schrift, Doody’s Book Reviews, May, 2014)

Users Review

From reader reviews:

Gary Gonzales:

Nowadays reading books are more than want or need but also become a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want attract knowledge just go with education books but if you want sense happy read one along with theme for entertaining including comic or novel. Typically the *Psychosurgery: New Techniques for Brain Disorders* is kind of guide which is giving the reader capricious experience.

Ernest Pettaway:

Information is provisions for folks to get better life, information these days can get by anyone in everywhere. The information can be a information or any news even a concern. What people must be consider if those information which is inside the former life are challenging be find than now could be taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you find the unstable resource then you understand it as your main information you will see huge disadvantage for you. All those possibilities will not happen throughout you if you take *Psychosurgery: New Techniques for Brain Disorders* as the daily resource information.

Manuel Pina:

Your reading sixth sense will not betray a person, why because this *Psychosurgery: New Techniques for Brain Disorders* book written by well-known writer who really knows well how to make book that can be understand by anyone who else read the book. Written in good manner for you, dripping every ideas and creating skill only for eliminate your personal hunger then you still question *Psychosurgery: New Techniques for Brain Disorders* as good book not just by the cover but also by the content. This is one guide that can break don't assess book by its protect, so do you still needing a different sixth sense to pick this specific!? Oh come on your looking at sixth sense already said so why you have to listening to one more sixth sense.

Ralph Pettie:

As a scholar exactly feel bored to help reading. If their teacher inquired them to go to the library or make summary for some book, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that reading through is not important, boring along with can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this *Psychosurgery: New Techniques for Brain*

Disorders can make you really feel more interested to read.
