Public Health: 2 By *Dona Schneider, David E. Lilienfeld*

Published in 2008, the first volume of Public Health focused on issues from the dawn of western civilization through the Progressive era. Volume 2 defines the public health challenges of the twentieth century--this important reference covers not only how the discipline addressed the problems of disease, but how it responded to economic, environmental, occupational, and social factors that impacted public health on a global scale. Major illnesses such as cancer, HIV, and tuberculosis are addressed, along with lifestyle concerns, such as tobacco and nutrition. Chapters also explore maternal-child and women's health, dental public health, health economics and ethics, and the role of philanthropy. Each chapter begins with an in-depth introduction, followed by three original articles that illustrate the problem. The volume is enhanced with a detailed chronology of public health events, as well as appendices that contain many of the original documents that ushered public health into the new millennium.

Editorial Review

Review

"A thoroughly engaging book. This is a book to be savored, to be picked up, and sampled from time to time."
(*Journal of the History of Medicine* 2013-04-01)

"Schneider and Lilienfeld have produced a text that captures the enormous breadth of public health over the past century as it expanded its scope from disease and disability to environment and occupational control."
(David K. Rosner *Columbia University Mailman School of Public Health* 2011-06-01)

"*Twentieth-Century Challenges* succeeds the first volume in this set. While volume 1 used selected works from individuals who drove the development of public health, volume 2 acknowledges technical advances, social movements, and the economic developments that drove the discipline. Recommended."
(*Choice* 2012-03-01)

"The editors have assembled a remarkably comprehensive and balanced set of milestone studies and provide insightful introductions to the challenges faced by public health practitioners during the twentieth century."
(Manning Feinleib *Johns Hopkins Bloomberg School of Public Health* 2011-06-01)

From the Inside Flap

Published in 2008, the first volume of *Public Health* focused on issues from the dawn of western civilization through the Progressive era. Volume 2 defines the public health challenges of the twentieth century--this important reference covers not only how the discipline addressed the problems of disease, but how it responded to economic, environmental, occupational, and social factors that impacted public health on a global scale. The volume is enhanced with a detailed chronology of public health events, as well as appendices that contain many of the original documents that ushered public health into the new millennium.

About the Author

Dona Schneider, Ph.D., M.P.H., is a professor and associate dean at the Edward J. Bloustein School of Planning and Public Policy at Rutgers University and the recipient of multiple teaching and service awards.

David E. Lilienfeld, M.D., M.P.H., is an internationally known physician epidemiologist and medical historian. He has published extensively on the history of epidemiology and public health and is the winner of the Society of Epidemiological Research's Professors' Prize in the History of Epidemiology.

Schneider and Lilienfeld are the coeditors of *Public Health, Volume One* (Rutgers University Press).

Users Review

From reader reviews:

Maurice Miller:
