## Editorial Review

### From the Back Cover

Succeed with Scrum in Even the Largest, Most Complex Distributed Development Projects "Forewords by Ken Schwaber, Scott Ambler, Roman Pichler, and Matthew Wang" This is the first comprehensive, practical guide for Scrum practitioners working in large-scale distributed environments. Written by three of IBM's leading Scrum practitioners--in close collaboration with the IBM QSE Scrum Community of more than 1000 members worldwide--this book offers specific, actionable guidance for everyone who wants to succeed with Scrum in the enterprise. Readers will follow a journey through the lifecycle of a distributed Scrum project, from envisioning products and setting up teams to preparing for Sprint planning and running retrospectives. Each chapter presents a baseline drawn from "conventional" Scrum, then discusses additional issues faced by distributed teams, and presents specific best-practice solutions, alternatives, and tips the authors have identified through hard, empirical experience. Using real-world examples, the book demonstrates how to apply key Scrum practices, such as look-ahead planning in geographically distributed environments. Readers will also gain valuable new insights into the agile management of complex problem and technical domains. Coverage includes - Developing user stories and working with Product Owners as a distributed team - Recognizing and fixing the flaws Scrum may reveal in existing processes - Engaging in more efficient Release and Sprint planning - Conducting intense, brief daily Scrum meetings in distributed environments - Managing cultural and language differences - Resolving dependencies, performing frequent integration, and maintaining transparency in geographically distributed environments - Successfully running remote software reviews and demos - Brainstorming what worked and what didn't, to improve future Sprints This book will be an indispensable resource for every team leader, member, product owner, or manager working with Scrum or other agile methods in any distributed software development organization.

### About the Author

**Elizabeth Woodward** is a Senior Software Consultant with IBM Quality Software Engineering under the Corporate Headquarters Office of Innovation and Technology. She has served as the project manager or development leader on more than 100 globally distributed projects for IBM and other development companies. Elizabeth coaches distributed software development teams to improve efficiency and effectiveness of their development practices. She has co-chaired the IBM Academy of Technology Conference on Agile Methods, teaches courses on Disciplined Agile Development, and co-leads the IBM Agile Community.

**Steffan Surdek** is a User Experience Lead and Agile Champion in IBM. He has worked in the software development industry for over fifteen years as a software developer, architect, project manager, and team leader. Steffan has managed and coordinated large-scale projects with teams distributed in as many as five countries--India, Egypt, Israel, China, and Canada. He coaches distributed agile teams, is a co-leader of the IBM Agile Community, and teaches Disciplined Agile Development workshops. He is an active member of the Montreal Agile Community and has written on agile methods and globally distributed development for developerWorks and *Dr. Dobbs Journal*. In his spare time, he does some writing on his website at [www.surdek.ca](http://www.surdek.ca).

**Matthew Ganis** is an IBM Senior Technical Staff Member and ibm.com site architect. Matt was a co-founder of the Agile@IBM Community and was an early adopter of agile within IBM. He currently teaches Disciplined Agile Development and has published numerous articles and papers on the use of agile methods

within ibm.com--both within its traditional web development and the development/support of their Second Life Island. Matt has been the co-chair and chair of the Academy of Technology's Agile Conferences for the past two years and is a Certified Scrum- Master and Practitioner. Outside of IBM, Matt serves on the editorial board of the *International Journal of Agile and Extreme Software Development* and is a steering committee member of New York City's Agile Project Leadership Network (APLN) chapter.

## Users Review

### From reader reviews:

#### **Susan Ford:**

As people who live in the modest era should be up-date about what going on or data even knowledge to make these individuals keep up with the era which can be always change and make progress. Some of you maybe will certainly update themselves by reading through books. It is a good choice for you personally but the problems coming to a person is you don't know what kind you should start with. This A Practical Guide to Distributed Scrum (IBM Press) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and want in this era.

#### **Mary Perez:**

The book untitled A Practical Guide to Distributed Scrum (IBM Press) contain a lot of information on that. The writer explains her idea with easy technique. The language is very easy to understand all the people, so do definitely not worry, you can easy to read it. The book was published by famous author. If you want to buy the e-book, you can available their official web-site as well as order it. Have a nice read.

#### **Lisa Knight:**

As a student exactly feel bored to be able to reading. If their teacher asked them to go to the library in order to make summary for some publication, they are complained. Just very little students that has reading's heart and soul or real their pastime. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that reading is not important, boring as well as can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this A Practical Guide to Distributed Scrum (IBM Press) can make you really feel more interested to read.

#### **William Pare:**

What is your hobby? Have you heard which question when you got learners? We believe that that problem was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person like reading or as reading through become their hobby. You should know that reading

is very important and book as to be the matter. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update regarding something by book. Different categories of books that can you choose to adopt be your object. One of them are these claims A Practical Guide to Distributed Scrum (IBM Press).
